## PROJECTS

**BLAD** · Donate, Connect, Impact          Nov 2023 - Dec 2023

Visit Site · Frontend Code · Backend Code

Technologies: Tailwind, React, Express, MongoDB, Firebase, TanStack, Axios, JWT, Vercel

- Engineered a dynamic user role system in React, ensuring precise access control and distinct privileges for Admins, Volunteers, and Donors.
- Designed an intuitive donation request interface using React, enhancing user experience and streamlining data input with Tailwind CSS.
- Implemented real-time donation status updates in React, fostering transparency for Volunteers and optimizing communication throughout the donation process..

**boipoka** · Discover, Borrow, Read          Nov 2023 - Nov 2023

Visit Site · Frontend Code · Backend Code

Technologies: Tailwind, React, Express, MongoDB, Firebase, TanStack, Axios, JWT, Vercel

- Crafted a streamlined user interface in React.js, facilitating easy exploration of books by genre.
- Implemented a visually enhanced feature with Tailwind CSS, displaying comprehensive book details for an engaging experience.
- Developed a responsive React dashboard, empowering users to manage borrowed books and account settings seamlessly.

**Electon** · Elevate Your Tech Game          Oct 2023 - Oct 2023

Visit Site · Frontend Code · Backend Code

Technologies: Tailwind, React, Express, MongoDB, Firebase, Vercel

- Engineered a curated display of top-brand gadgets for an optimized shopping experience.
- Designed and implemented an intuitive, user-friendly interface for efficient navigation and seamless browsing.
- Engineered robust encryption protocols to ensure secure transactions, safeguarding user data and privacy during online purchases.
